

BENEFITS

CompoClay has the unique properties of being sustainable, safe, durable and versatile for design.

SUSTAINABLE

- Composed of natural and abundant materials
- Low carbon footprint
- Clean product life cycle

SAFE

- MAS Certified Green for zero VOC-emission
- Class Zero non-combustible material per BS 476: Part 4 and 7 Standards
- Free of fire toxins, heavy metals and asbestos

DURABLE

- Outstanding resistance to UV radiation, moisture, freeze-thawing and thermal shock
- Highly resistant to mold, mildew and termite growth
- Compressive and impact strengths surpassing traditional materials

VERSATILE

- Able to emulate anything from wood and metal to stone and ceramic
- Easily molded for complex shapes and detailed surface definitions
- Flexible weight and density
